Being overweight or obese can raise your risk of diabetes. If you are overweight, losing 5% of your starting weight may prevent or delay the disease and improve your health. With our meal delivery program, you get delicious food that also promotes weight loss.

How it works:

- There are four types of meal deliveries:
 - Meal delivery for pre-diabetics and uncontrolled diabetics
 - Meal delivery for pregnant enrollees
 - Meal delivery for pregnant enrollees with diabetes and/or hypertension
 - Meal delivery for enrollees who have recently left the hospital
- While enrolled in the program, enrollees receive hands-on lessons on nutrition and healthy cooking.

Ask your provider or an AmeriHealth Caritas DC care manager for more information.
